MOSES K TAPFUMA · MVEOS

Quotation — Phase 1

Modern Xpress Couriers, Lusaka, Zambia · prepared 31 October 2026 · reference MX-P1-Q-2026-10-31

info@ktasolutions.co.za

> **Status.** This quotation is prepared for issue and takes effect when it is signed by Moses K Tapfuma for MVEOS and accepted by Modern Xpress Couriers. Until it is signed it is a proposal price for discussion, and no work is committed. **No deposit is requested and no invoice is raised before the Phase 1 acceptance gate is signed off.**

1 · The work

Phase 1 is the site you can point at: unblock and content integrity. Nothing in it requires a new platform, a new board decision or a tracking build.

item	scope	what "done" looks like
P1-01	Mandate, access inventory, full site backup and database export, documented rollback path, staging clone, analytics baseline	verified backup and rollback path, staging readback, dated baseline record
P1-02	Brand canonicalisation, information architecture, URL map with a 301 plan	the IA and URL map approved in writing by your named approver
P1-03	Template residue removed; permanent redirects placed	a dated record showing the residue pages no longer published and every

	where a live address must survive	replacement resolving — no silent deletion of a live route
P1-04	Twelve core pages written from client-supplied facts only; the enquiry form rebuilt	twelve pages published with your factual approval, and an enquiry-form record — no invented phone number, coverage claim, service level or legal conclusion
P1-05	Page titles, link previews and structured data across those pages	each gate re-measured green on dated records with a checksum
P1-06	Accessibility and structure pass — heading order, one main region, image descriptions, zoom, forms	each gate re-measured green on dated records with a checksum
P1-07	Footer, legal-notice route and privacy route	routes built and wording prepared for review by your counsel. We do not write or approve your legal sentence
P1-08	Security-hardening recommendations issued to our platform engineering team	a written recommendation delivered and a written answer received, each referenced by path and checksum
P1-09 *(optional)*	The rate-request page and its link-preview card	included only if marked at signature below. It is handed off to WhatsApp with the phone as the fallback, never WhatsApp-only
P1-10	Phase 1 exit and acceptance	the Phase 1 gate set re-measured on named dated records, signed by your named approver

2 · Price

OPTION A — PHASE 1

ZAR 50 000

exclusive of VAT · scope P1-01 to P1-08 and P1-10 (P1-09 excluded)

OPTION B — PHASE 1 WITH THE RATE-REQUEST PAGE

ZAR 56 000

exclusive of VAT · scope P1-01 to P1-10 (P1-09 included)

- **Currency.** ZAR. If you want the quotation in ZMW or USD, ask and we re-issue it in that currency rather than converting a number on this page — a converted figure has a rate and a date attached to it, and we would rather print the real one.
- **VAT.** VAT is not added unless it is due. The treatment is confirmed by your accountant, not by us; we do not publish a tax position on your behalf.
- **Pass-throughs.** Hosting, domain, DNS, messaging, transactional email, telematics, SMS, mapping, security scanning, licences and any other third-party cost are quoted **at cost, one line at a time, and only after you approve the line in writing**. None is bundled into the fee and none is committed by this quotation.
- **The fee is fixed for the scope marked below.** A fee for one scope never prices the other scope.

---

3 · Payment

term	what it is
Deposit	**None.**
Invoice trigger	One invoice, at the moment the Phase 1 acceptance gate is signed off by your named approver. No invoice before that.
Amount	100% of the fixed fee for the elected scope.
Due period	30 days from the invoice date.
Post-acceptance retainer	**None.** A support retainer can be quoted separately if you want one; it is not part of this fee.

> **The evidence that comes with the invoice is the evidence the acceptance rests on** — a named dated record with a checksum for each gate, re-measured against live bytes. We invoice against proof, not against a promise.

---

4 · When the work starts and when this quotation expires

Client inputs and commencement. Phase 1 begins on receipt of the last of these seven inputs:

1. WordPress editor access
2. hosting control
3. staging access
4. the order-taking number and its fallback number
5. the response standard
6. the named factual approver
7. the client facts required for the twelve pages

Receipt of part of these inputs does not commence Phase 1 and does not start the delivery clock. If all of them have not arrived, the fixed fee is unchanged and the Phase 1 start date slides accordingly.

> **Quotation date:** the date this quotation is signed. **Valid through:** the date 30 calendar days after the quotation date. The client-input commencement condition does not extend, renew or suspend this validity period.

---

5 · What this quotation does not include

1. **Phase 2** — channel wiring, owned social publishing, organic foundations, transactional email and the monthly reporting dashboard.
2. **Phase 3** — parcel tracking or vehicle-fleet visibility, including the discovery session, data model, integrations, build, controls, notifications and pilot. No code before the discovery gate.

3. A host, tracking product or licence estimate. Discovery output must exist first and is then priced separately.
4. Any third-party cost (see §2).
5. A support or maintenance retainer after acceptance.
6. Legal advice, a tax opinion, a compliance conclusion, an insurance opinion, or any representation of what Zambian or South African law requires of you.
7. Content facts, proof points, coverage, fleet size, transit times, service levels, prices or phone numbers that you have not supplied and approved.
8. Any exclusivity, non-circumvention, minimum spend, future-work promise, discount against a later phase, or right to use your marks beyond the accepted deliverable.

---

6 · Both sides' commitments

- **Before you accept:** we have performed no billable work under this quotation and hold no pass-through float.
- **Reversibility:** a verified full backup, database export and documented rollback path precede the first live change.
- **Scope change:** no phase price changes by oral implication. A change is priced in a new written instrument and agreed before it is delivered.
- **No prepayment buys future work.** A deposit, if one is agreed, buys no exclusivity and no promise of a later phase.
- **Revocation:** MVEOS may revoke the authority to issue this quotation in writing before you accept it. Revocation does not erase an already accepted contract.
- **Your inputs are on the critical path.** Rate card, service list, lane list, size bands, proof points, document flow and consent wording are yours. If they are not supplied, the work waits — the fee does not change and the start date slides.

---

7 · Signature

Mark one scope, then sign.

Scope election (mark one)

□ **Option A** — Phase 1 excluding the rate-request page (P1-09): **ZAR 50 000** exclusive of VAT.
□ **Option B** — Phase 1 including the rate-request page (P1-09): **ZAR 56 000** exclusive of VAT.

Moses K Tapfuma, MVEOS — signature	Date
For Modern Xpress Couriers — name and title	Date

Prepared by Moses K Tapfuma / MVEOS for Modern Xpress Couriers · 31 October 2026 · reference MX-P1-Q-2026-10-31. This is a prepared quotation and takes effect on signature. It is not an invoice, a purchase order, a budget, a spend approval or a tax instruction, and it commits nobody until signed.
